

## Zip Bandit Makes Castration Quick, Easy

No expensive tools are needed to apply Zip Bandits to bulls or other animals needing castration. Just pull the Zip Bandit tight and wait for the testicles to drop off.

"We've used them on bulls from 250 to 800 lbs.," say Brian Kuperus, Zip Bandit.

The Zip Bandit lead is passed around the scrotum and fed through the head. As it is pulled tight, the rubber stretches around the scrotum.

"It takes about 4 weeks to work on smaller animals. Perhaps because of the weight, the testicles of larger cattle take 2 ½ to 3 weeks to drop."
